

## ● ABOUT ME

My name is Yusufbek, I'm a JavaScript/TypeScript software engineer with over 5 years of experience. During my career I have been fortunate to work on creating high-quality software using various JavaScript technologies, particularly React and Node. I have worked on delivering and architecting complex CRM systems, internal tools, and micro front-ends. I actively participate in decision-making processes and setting team goals. Learning new technologies is a passion of mine, and I constantly work to improve my skills and workflow.

## ● WORK EXPERIENCES

### ○ Software Engineer

Sphere Partners (2022 August - 2023 February)

- Refactored from monolith to microservices for internal tools used by Member Experience team.
- Developed and delivered new features to enable seamless group transitions
- Participated in decision-making regarding architecture, code style, and prioritization
- Used techs: Nest.js, React.js, Retool, TypeORM, PostgreSQL, Apollo Federation, GraphQL, TypeScript

### ○ Software Engineer

EPAM Systems (2021 December - 2022 August)

- Developed internal tools to accelerate time to market. Internal tools such as microfrontends, its CLI tools to generate new projects
- Actively participated in decision-making, identifying the team's short-term goals as well as long-term goals.
